# 1/4"-4" SW High Pressure Pipe Fittings Union For Gas Industry

# **Basic Information**

Place of Origin: CHINABrand Name: DEYE

Certification: ISO9001:2015 PED

Model Number: PF-BS-F3Minimum Order Quantity: 10PCS

• Price: USD2-USD50 each pc as per different

materia

Packaging Details: cartons + ply-wooden cases
Delivery Time: 7 days for stock items
Payment Terms: L/C, , T/T, D/P

Supply Ability: 10000pcs each momth

# **Product Specification**

Standard: ANSI B16.11

• Material: A105, A105N. A350LF2, F22, SS316,

SS304, DUPLEX SS, ALLOY STEEL

• Pressure: 2000#, 3000#, 6000#, 9000# 2000LBS

3000LBS 6000LBS 9000LBS

Connection: Socket Welded SW Threaded NPT BSPT

BSPP

• Size: 1/4"-4"

Surface: Black, Pickling, Anti-rust Oil
Highlight: 4in High Pressure Pipe Fittings,

A105 High Pressure Pipe Fittings, 3000LBS high pressure rotary union

#### **Product Description**

#### 3000LBS SW High Pressure Fittings Union For Gas Industry

Forged high pressure Union is a commonly used pipeline connection that can be easily installed and disassembled. It mainly consists of three parts: locking nut, cloud head, and flat joint. Deve Piping Industry supply various types of forged high and medium pressure union joints, which are machined from round steel or steel ingots after forging. The connection forms are divided into socket welding (socket welding union), threaded connection (threaded union), but welding connection (butt welding union), internal and external tooth connection, etc. The main manufacturing standards are ASME B16.11 and MSS SP 83. Due to the fact that the union joint is composed of a locking nut, a cloud head, and a flat joint, and is sealed with a spherical hard seal and a PTFE gasket (or copper gasket) soft seal, it has good sealing performance and extremely high leakage resistance. At the same time, it is also extremely convenient for pipeline installation, use, and maintenance.

#### Product Information/Product Description/Basis Information/Specification

| Production Name | ANSI B16.11 Forged pipefittings with Socket Welded ends or Threaded ends   |
|-----------------|--|
| Types           | 90deg Elbow, 45deg Elbows, Street elbow, Tee, cross, full Coupling, half coupling, square Cap, square plug, Hex. Nipples, Bushing, Union, Barrel Nipple, Boss, weldolet, socketolet, threadolet etc            |
| Size Range      | 1/8" 3/4" 3/8" 1/2" 3/4" 1" 1-1/4" 1-1/2" 2" 2-1/2" 3" 4"  |
| Threaded Types  | NPT ANSI B16.25 DIN BSPT   |
| 1               | Carbon Steel: ASTM A105 ,A 182 Grade F 1, A 182 Grade F 5, A 182<br>Grade F 9, A 182 Grade F 11, f12, f22 A 350 Grade LF 1, A 350 Grade LF2,<br>A 350 Grade LF 4, A 350 Grade LF6, LF8                         |
| Material        | Stainless Steel: F304(L), F316(L), SS321, SS347H, 904L DUPELX SS 2507, 2205, UNS31803, UNS32750 18Cr-10Ni-Tl 25Cr-20Nl 22Cr-5Ni-3Mo-N 25Cr-7Ni-4Mo-N 24Cr-lONi-4Mo-V 25Cr-7Ni-3.5Mo-W-Cb 25Cr-7Ni-3.5Mo-N-Cu-W |
| Standard        | ANSI B16.11, MSS-SP 97, JIS, etc   |
| Pressure        | 2000lbs, 3000lbs, 6000lbs, 9000lbs, etc  |

#### Features /Characteristics

Strength and Durability: Forged pipe fittings are known for their superior strength and durability compared to fittings made through other manufacturing methods. The forging process creates a dense and compact structure that can handle high-pressure and high-temperature applications.

Leak-Free Performance: The tight grain structure of forged fittings ensures a leak-free connection. The absence of porosity or voids in the metal reduces the risk of leaks or failures, making them suitable for critical applications where leakage is not acceptable.

Pressure Ratings: Forged pipe fittings generally have higher pressure ratings compared to fittings made by other methods. This makes them ideal for systems that operate under high pressure conditions.

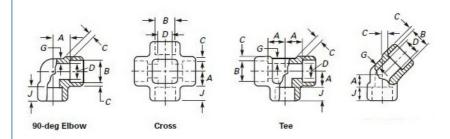

Resistance to Corrosion: Forged fittings are available in various materials such as carbon steel, stainless steel, and alloy steel, which offer excellent resistance to corrosion. The choice of material depends on the specific requirements of the application, ensuring compatibility with the transported fluid or gas.

Wide Range of Shapes and Sizes: Forged pipe fittings are available in a wide range of shapes and sizes to meet different piping system requirements. Common types include elbows, tees, crosses, couplings, unions, caps, and plugs. Versatility: Forged fittings are suitable for use in various industries such as oil and gas, petrochemicals, power generation, and chemical processing. They can handle different types of fluids, gases, and temperatures, making them versatile for diverse applications.

Quality and Consistency: Due to the controlled forging process, forged pipe fittings exhibit consistent quality and dimensional accuracy. This ensures that the fittings can be easily installed and provide a reliable connection within the piping system. Longevity: With their robust construction and resistance to wear and tear, forged fittings offer a longer service life compared to other types of fittings. Proper installation, maintenance, and adherence to recommended operating conditions can further enhance their longevity.

General Note: Dimensions are in millimeters.

## Application/Usage

Forged high pressure fittings are commonly used in a variety of industries and applications involving high pressure fluid or gas systems. Some specific applications and uses of forged high pressure fittings include: Oil and Gas Industry, Power Generation, Chemical Processing, Pharmaceutical industry, Water Treatment, Mining and Construction, Aerospace and Defense HVAC and Piping

### **Material Grades:**

Forged high pressure pipefittings here mentioned below are only a few of those covered by B16.11 standard. The physical and chemical values indicated correspond to the latest issued standard, although they are affected by modifications year after year, so we suggest to use them only as a guide.

**Products for shipment** 

## **Our Service**

- 1. Technical support
- 2. Raw Material Quality control.
- 3. Inspection during the production time.
- 4. Final Test includes Surface, Dimension, PT Test, RT test, ultrasonic Test
- 5. Test Report each shipment
- 4. Flexible Delivery terms. EXW FOB CIF CFR DDP DDU
- 5. Flexible payment Ways: LC. TT. DP
- 6. Customized Package includes Logo. Cases Dimension.
- 7. 18 months quality Guarantee time.9. Free replacement by air if any error founded
- 10. 24 hours to Feedback your questions
